

# Transport rack

Transport and archiving of tubes

## Objectives

The transport rack is a logistics utility lead to an efficient workflow from submitter, pre-analytics, handling, internal laboratory process, up to the archiving of the samples.

It's already in use in laboratories in the field of automated sample sorting, and in smaller laboratories for secure sample transport according to UN3373.

Measurements: 219 x 21 x 59 mm  
Type/ID-No.: 8508409  
Material: Polycarbonate PC20GF

## Advantages

- Transports samples constantly in upright position
- Firmly holds glass and plastic tubes of common manufacturers with outer diameters from 11 to 17 mm
- Autoclavable at temperatures of up to 134°C (273,2° F)
- Suitable for dish washers, common cleaning detergent and disinfectants
- Adjusted to the usage with the GBO transport box
- Individual colors according to customer preference

- Can be labeled according to customer preference (e.g. with barcode or owner label)
- Suitable for centrifugation

## Notes

- Patents pending
- Independent from system supplier
- Developed and tested to insert and remove tubes up to 10.000 times
- No extra security issues have to be considered because of the special construction. No CE label necessary.
