

Quality Engineer

STIWA US INC.

Rock Hill / South Carolina

Is "Quality First" a challenge you are ready to take on? Then you've come to the right place!

STIWA Manufacturing is part of the STIWA Group and transforms innovative product ideas into marketable serial products—from initial development through to large-scale series production. Through innovative manufacturing technologies and holistic quality management, we establish the foundation for cost-optimized implementation. Thanks to highly automated and software-networked production, we guarantee the highest quality and maximum flexibility. Help us shape the industry of the future—**apply now as a Quality Engineer!**

» Your duties

- To expand our Quality Engineering team, we are seeking a highly capable professional to shape our projects—from initial prototyping through to series production—from a quality engineering perspective, thereby ensuring lasting customer satisfaction through high-quality manufacturing
- Integrated into our development and production teams, you will apply quality methods for quality planning, risk analysis, product release, and problem-solving
- You will oversee the product throughout its entire lifecycle and serve as the primary point of contact for both internal manufacturing and the customer regarding all quality-related matters
- You will support internal and external audits and play an active role in customer audits

» Your profile

- Completed technical education (e.g., HTL, FH) in mechanical engineering or a comparable field
- Several years of professional experience in quality planning and operations
- Proficiency in applying quality methods such as APQP, FMEA, MSA, SPC, PPAP, and 8D, and familiarity with the requirements of IATF, VDA 6.3, and ISO 9001
- A high degree of independence, analytical thinking skills, and a proactive, self-driven approach to work
- A strong sense of responsibility, as well as excellent communication and teamwork skills
- Business fluency in German and English & Willingness to travel (approx. 10%).

» Our offer

- A challenging and responsible position in a high-tech company with an international background
- Ample benefits (Health insurance package, regular activities) after 2-month probation period
- Paid vacation
- Thorough training provided to help you become an industry leader.
- Starting with \$80,000/salary with a willingness to offer a higher salary depending on specific professional experience and qualifications
- This position is fully onsite in Rock Hill, SC, Monday - Friday
