

CNC Machinist (Turning)

STIWA US INC.

Rock Hill / South Carolina

We're looking for a skilled **CNC Machinist (Turning)** to join our team and help operate and maintain our precision CNC turning machines. This is a hands-on, technical role ideal for someone with prior CNC machining experience. If you're looking to improve your skills in a high-quality manufacturing environment and not just a general warehouse job we'd love to hear from you.

▲ Please note: This position requires previous CNC machining experience. Candidates without it will not be considered.

» Your duties

- Set up CNC turning machines (like DMGMORI) with all necessary tools, fixtures, and materials to begin production.
- Monitor machining runs and use precision measuring tools to ensure every finished part hits exact specifications.
- Perform tool changes, adjust parameters, and quickly resolve any machine errors to keep production moving.
- Maintain a safe, organized workspace and collaborate with the team to find ways to boost overall machining efficiency.
- Accurately track and record production output, scrap rates, tool usage, and routine maintenance logs.

» Your profile

- High school diploma/GED required, with **proven experience operating CNC turning machines** in a manufacturing setting.
- Proficient in reading complex blueprints and technical drawings, with a solid grasp of **G-code, CAD/CAM**, and turning techniques.
- Experience with **Fanuc or Siemens controls**; specific familiarity with **DMGMORI lathes** is a major plus.
- Strong problem-solving skills and a commitment to precision, safety, and high-quality production standards.
- A reliable, accountable communicator who embraces lean manufacturing and thrives in a collaborative, high-performance team.
- This position is fully onsite in **Rock Hill, SC**, Monday–Friday; candidates must live within a reasonable commuting distance.

» Our offer

- **Starting pay of \$25.00–\$32.00/hr (DOE)** with shift options and available shift differentials.
- Full medical, dental, vision, and 401(k) package starting after a 2-month probationary period.
- Join a family-owned industry leader with an international team, featuring structured onboarding and paid time off.
- Opportunities to grow from a technical, hands-on role into team leader or supervisory positions.
